# **Wireless Network Configuration for Windows 7**

1. Go to the Network and Sharing Center. The quickest way to do this is to right click the network icon from the system tray and select **Open Network and Sharing Center**

2. Click on **Open Network and Sharing Center**

3. Click on **Manage Wireless Networks**
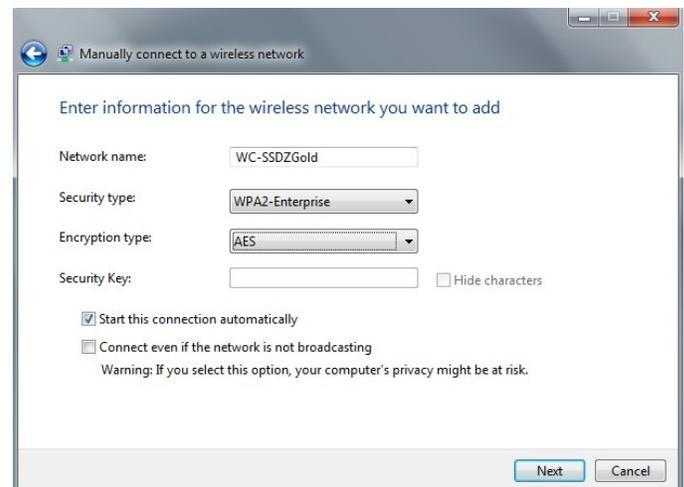

4. Click on Add

5. Select **Manually create a network profile**

6. Enter the Network name: **WC-SSDZGold**

7. Select the Security type: **WPA2-Enterprise**

8. Click **Next**

9. At this point you will have successfully added WC-SSDZGold but you will need to continue by selecting the **Change connection settings**

10. Click on the **Security** tab in the resulting window.

11. From the dropdown under Choose a network authentication method, select: **Microsoft: Protected EAP (PEAP)**

12. Uncheck the **Remember my credentials for this connection each time I'm logged on**. Remembering credentials isn't advised on a shared device.

13. Click **Settings**.

14. Uncheck **Verify the server's identity by validating the certificate** leaving the box empty.
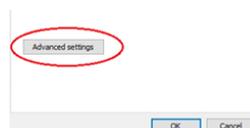

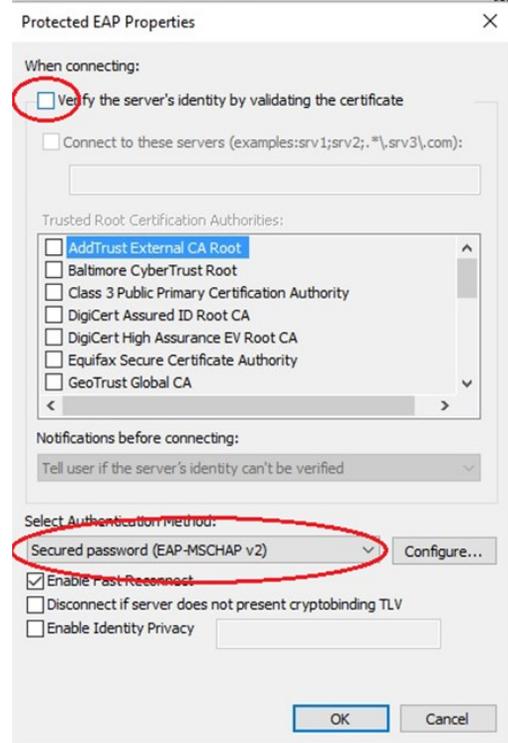

15. Further down on the same dialog box, choose the Select Authentication Method: **Secured Password (EAP-MSCHAP v2)**

16. Click **Configure**

17. Uncheck the box beside: **Automatically use my Windows logon name and password**
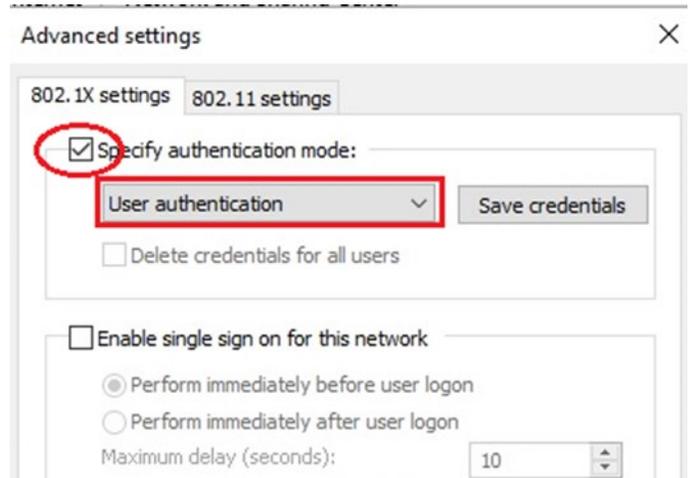

18. Click **OK, OK**

19. Click **on Advanced Settings**

20. Select the **802.1X settings** tab

21. Place a check mark beside **Specify Authentication Mode** and then select **User Authentication** from the drop down box. There is an option to save the username and password if you specify it under **Save Credentials** which isn't advised on a shared device.

21. Click **OK. OK, Close**

22. Set up is complete. A pop up will display near the system tray at the bottom of your screen. **Additional information is needed to connect WC-SSDZGold**. Click to provide additional in-formation

23. You will be asked to provide your **User name and Password**. Use your Wolf Creek user name (firstname.lastname) and your Wolf Creek password.

25. **Done!** Set up is complete and you are logged into the Wolf Creek SSDZ Wi-Fi and connected to the internet.
